Estudiantil

Habitualmente, el nivel más alto de logro se refleja en el nivel más alto de calificación. Por ejemplo, el nivel más alto de logro en la evaluación de lectura en inglés de 11.º grado es la calificación de 4. Sin embargo, en algunas evaluaciones, como las pruebas de aptitud física, el nivel más alto de logro no se refleja en la calificación más alta. Por ejemplo, en la prueba de aptitud física de 5.º grado, el nivel más alto de logro es la calificación de 1. Por lo tanto, al interpretar los datos de las pruebas, es importante tener en cuenta el significado de las calificaciones en la prueba específica que se está analizando.
